VidaBox Releases the vController™ - a Solid, Feature-Rich Hardware Solution Integratable with Software-Based Automation packages

Westbury, NY – July 17th – VidaBox is excited to offer the vController™, a powerful rack-mountable automation solution. Designed for heavy-duty automation, it comes standard with four USB ports, dual Ethernet Ports, VGA video out, and two standard RS-232 ports. Optionally, it can be configured with up to nine RS-232 ports for the most demanding of integration projects.

“With the growing popularity of PC-based automation platforms, integrators have been looking for a solid, pre-built hardware solution where they can reliably run their software,” explains Steven Cheung, President of VidaBox LLC. “The vController™ is specifically designed to meet that need. It comes in a rack-mountable form factor at only 1U tall, yet sports a wide array of connectivity options. When used in conjunction with software packages such as Charmed Quark System’s CQC platform, it can replace proprietary solutions and provide similar functionality at a fraction of the cost.”

Based on the XP operating system, the vController is compatible with a wide range of automation solutions, allowing an integrator to combine it with their favorite software package to control a myriad of devices via TCP/IP, RS-232, IR, and other communication protocols.

“While the vController is available as a standalone product,” continues Cheung, “it’s ideally used with CQC as a part of a predesigned vAutomation™ package, serving as its automation & control backbone. By choosing a vAutomation package, integrators can save hours of design work and product testing that traditionally needs to go into every new project, reaping tremendous time savings.”

The vController is available now, and ships with options for 2, 6, or 9 RS-232 ports. For more details and specifications on the VidaBox vController™ and their comprehensive line of media servers and extenders, please visit the company website at <http://www.vidabox.com>, or visit them in Sound Room 17 at CEDIA Expo 2008!

About VidaBox LLC

VidaBox LLC is a systems integration company focused on manufacturing premium Media Center systems & home AV solutions. VidaBox is on a mission to create user-friendly, stable high-performance Media Center systems that work right out of the box. For more information, visit www.vidabox.com or call 1-516-730-7500.
