PRESS RELEASE

EMBARGO: November 5th, 2008

Contact: Steven W. Cheung, 516-730-7500 x4201

New VidaBox RackClient v2™ provides Blu-ray & DVD streaming with native 1080p playback & 7.1 lossless HD audio support via HDMI

Westbury, NY – November 5th – VidaBox is proud to announce RackClient v2™, the newest edition to VidaBox's comprehensive line of media extenders. This will be the first rack-mountable VidaBox extender that supports both native 1080p playback and 7.1 lossless audio over HDMI. Available in a 2U tall chassis, this 20" deep unit provides streaming for unencrypted Blu-rays, DVDs, music, pictures, and other digital media.

"We're thrilled to add the RackClient v2™ to the VidaBox family of extenders," states Steven Cheung, President of VidaBox LLC. "Not only is it priced less than the original RackClient extender, but when combined with the recently released RoomClientHD™ for in-room installations and our new RackServer™, integrators can choose from a complete line of easy-to-install, feature-packed media servers and extenders."

Like the original RackClient™, the RackClient v2 has a Blu-ray drive option, as well as an optional, field serviceable hard drive for quick, easy replacement in the event of a drive failure. Every RackClient v2 extender is preconfigured at the factory for plug-n-play installation with RackServer™ systems & is ready for integration with VidaBox's vAutomation platform, reducing time spent on the field to maximize time & labor savings.

"The biggest difference that the RackClient v2 offers over our other extenders is lossless audio support," continues Cheung. "Like the RoomClientHD, the RackClientv2 sports a native HDMI output that provides LPCM audio, allowing an end user to experience true, uncompressed HD quality audio from DTS-HD, Dolby TrueHD, and DTS-MA formats. In concert with its native 1080p and upscaling abilities, RackClientv2 sets a whole new standard for high-end, rackmountable media extenders."

The RackClient™ v2 is available & shipping now. For more details and specifications on the RackClient™ and VidaBox's comprehensive line of media servers, extenders, and complete entertainment and vAutomation™ control solutions, please visit the company website at <http://www.vidabox.com>, or see them at International CES in the North Tower Suite H22-121!
