# VidaBox Stuffs Up to 6.0TB of Storage, Blu-ray, HDMI1.3, RAID5, and More into a New SLIMv3 Media Center

---

Atlanta, GA – CEDIA Expo 2009 – September 10th – Booth 6451 – VidaBox, LLC is thrilled to present the new Vista-powered SLIMv3™ media center at the CEDIA Expo. A replacement to the SLIMv2™, this 4.5" tall server/player offers new options like massive storage for up to 6TB for 900+ unencrypted DVDs, HDMI1.3, RAID5 protection, and quiet performance with advanced cooling and internal suspension hard drive mounting design. For easy access & convenience, it still has a full-fledged card reader and dual USB ports behind a flip-down front panel for connecting digital cameras, iPods®, and other devices.

"The SLIMv3™ is our most advanced combination media server & player to date," explains Steven Cheung, President of VidaBox LLC. "With its premium, AV component styling, no other system offers these many options and features in such a short, compact size. Even when upgraded with quad tuners, multiroom audio streaming, whole house video server support, and other high-end features, this high-performance system still runs quietly – perfect for in-room installations."

SLIMv3 achieves near-silent performance with an advanced cooling design that goes beyond just installing quiet fans. First, an intake grille laminarizes incoming air flow to prevent noise from flow turbulence. This cool air then passes by the hard drives, which are all suspended in mid-air with shock-absorbing rubber mounts to deaden any noise from vibrations. Another air intake from its top is regulated by a temperature sensitive fan, which slows down to minimize fan noise. Finally, the outgoing air flow is ejected out the back, preventing noise from easily re-entering the room.

"In addition to massive storage, upgradability, and quiet performance, the SLIMv3 delivers unprecedented AV quality with crystal clear picture & sound," Cheung explains. "With its HDMI1.3 option, enthusiasts get to experience rich, 1080p video in concert with complete, 7.1 surround sound and full support for the latest high definition audio formats like DTS-HD, DTS-MA, and Dolby TrueHD. SLIMv3 even offers true RAID5 as an option to efficiently protect system data while dramatically improving its video server throughput capabilities. Simply put, the combination of compact size, upgradability, features, and performance is simply unparalleled on the new SLIMv3 system."

The VidaBox SLIMv3™ is shipping and available now, and is being showcased in Booth 6451 at the CEDIA Expo. For more details and information on the SLIMv3™ & other VidaBox media centers, audio servers, touchscreens, or other entertainment and control solutions, please visit the company website at <http://www.vidabox.com>, or call 516-730-7500.

### About VidaBox LLC

VidaBox LLC is a digital entertainment and controls solutions company focused on manufacturing premium media centers, audio servers, and integrated home control & automation solutions. VidaBox is on a mission to create user-friendly, stable, high-performance Media Center systems that work right out of the box and integrate seamlessly with multizone audio and smart home technologies. For more information, visit [www.vidabox.com](http://www.vidabox.com) or call 1-516-730-7500.
