Ultra-versatile, Double-gang Sized, VidaBox Touch3.6™ Color Touch Screen Controls AV Playback, Lights, Climate, & More via vAutomation

Garden City Park, NY – October 12th – VidaBox, LLC is proud to announce the newly redesigned Touch3.6 in-wall touchpad. This new model supersedes the previous design released earlier this year, providing new features like enhanced screen clarity, hardened reliability, and centralized management software tools for integrators.

"We're absolutely thrilled to offer the new Touch3.6 panel," exclaims Steven Cheung, President of VidaBox, LLC. "Touch3.6 allows any integrator to easily control anything in the house - lighting, security, climate, shades, multiroom AV, etc. – from a single, double-gang sized touch panel. This is all possible with vAutomation's support for customizable interfaces – making it perfect for residential, commercial, or any installation scenario."

Unlike traditional setups where there are separate keypads for lights, music, climate control, etc. – integrators can now use a single Touch3.6™ to replace them all. This all-in-one control requires only a single CAT cable with power-over-Ethernet for connectivity, making it perfect for retrofits. A vController™ loaded with vAutomation software acts as the brain to process user selections from each Touch3.6™, and sends out the appropriate commands to control devices via RS-232, TCP/IP, or IR. Simultaneously, vAutomation provides 2-way feedback to each touch panel wherever applicable.

"While customers will enjoy the simplicity of having smaller, neater controls," continues Cheung, "integrators will love the fact that they can go back to their current clients who have basic AV systems like whole house audio, and be able to upgrade them to integrated controls by having to only replace the in-wall touch pads. When combined with the interface customization and control capabilities of vAutomation, ease of installation for new or retrofit projects alike, and relative low cost, it's easy to see why Touch3.6™ is the smart choice in any whole house or commercial AV and integration projects."

The Touch3.6™ is available now for dealers who have attended and completed vAutomation training. For more details and specifications on the Touch3.6™, vAutomation training, and other VidaBox digital entertainment and control solutions, please visit the company website at <http://www.vidabox.com>, or call 516-730-7500.
