

PICOPC

An ultra-reliable, compact mini PC w. write protection

Designed for connectivity to TVs for web browsing, email, and other PC tasks

- Ultra compact & small – only 13 ounces!
 - Hide behind any HDTV; simple install w. velcro
- Completely silent – no fans, no hard drives
 - Ultra reliable since there are no moving parts
- Embedded write protection
 - Allows PicoPC to be TRULY virus & mal-ware proof
 - Resets to locked down condition w. a quick reboot
- Low-voltage w. low power consumption - 18W max.
- Built-in single (1) RS-232 port allows local control
- No VidaBox required – standalone operation
- **DOES NOT ACT AS EXTENDER** – cannot stream DVDs!
- Not recommended for video streaming
- Install any XPe compatible software onto the system, such as CQC, to turn the PicoPC into an ultra-powerful automation platform!
