

TOUCH SCREENS

TOUCHCLIENT12™: A 12.1" in-wall LCD touch screen w/ built-in client: New Re-design – Better screen & better touch performance

- Includes in-wall enclosure
- 12.1" display size (diagonal) w. 250k+ colors
- 640x480, 800x600, 1024x768 & up resolution accepted (1024x768 recommended)
- Resistive touch screen, USB interface
- Completely silent - fanless
- Low-voltage power consumption w. 12v 2a power supply (optional 120V AC available)
- Bezel ready for any wall paint to match any décor
- Includes integrated client. All it needs is power and network connection.
- Has an independent desktop to work from, and does not use memory or processing power of main VidaBox server. Only uses resources of a VidaBox server for control of Multi-Zone audio software, mControl Pro, & vAutomation, minimizing your hardware requirements.
- Can be used to work with non-VidaBox systems for home automation – lighting, temperature, security!

Note: TouchClients can only be used on interior walls. Exterior in-wall use will expose unit to environment extremes, shorten its lifespan, and void its warranty.

Hardware Specifications	
Screen Size	12.1"
Native Res.	1024x768
Brightness	450 cd/m ²
Contrast	700:1
Colors	More than 250k
Pixel Pitch	0.24 (H) and (V)
Viewing Angle	160° Horizontal 160° Vertical
CPU Clock	500MHz
RAM	512MB Embedded
I/O Ports	1x RS-232/422/485 Port 1x RS-232 Port 2x RJ-45 Ethernet Ports 10/100 2x USB Ports 1x Power & 1x Reset Switches
Storage	1GB CFII SSD
Speakers	1.5W stereo
Wireless	(Optional) 1x MiniPCI 802.11b/g
Materials	Aluminum & Steel
Operating Temp. Range	32°F to 120°F (non-condensing)
