

## Installation Instructions

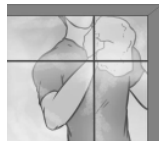

### Fixed SLIM Wall Mount Permanent Adhesive Kit Ideal for Glass Surfaces

#### This kit includes:

- (1) Alcohol Wipe
- (2) Permanent Adhesive Strips

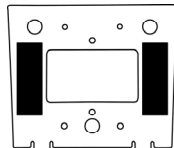

1. Using the alcohol wipe, clean the glass surface where we will be mounting the wall plate.  
Be sure the surface is free of dirty, grime, or other debris to ensure a permanent installation.

Note: Take the time & effort to properly clean the glass surface. Any contaminants will compromise the kit's adhesion strength. Additional cleaning may be required above and beyond using the supplied alcohol wipe to ensure the surface is truly clean.

2. Next, wipe the back of the Wall Plate that will be mounted. (Shown on right)  
Be sure the surface is free of dirty, grime, or other debris to ensure a permanent installation.

3. Apply the (2) adhesive strips onto the back of the wall plate. (Same surfaces as step 2)  
DO NOT REMOVE the backing tape yet.

4. Assemble the enclosure to the VESA plate, then mount it onto the wall plate  
**WITHOUT REMOVING THE BACKING TAPE.**  
Place it on the glass wall at your ideal, final position.

5. Be sure this position is satisfactory BEFORE proceeding.  
**WARNING: ONCE THE ADHESIVE IS APPLIED, it will be EXTREMELY DIFFICULT / IMPOSSIBLE TO REMOVE.**

6. Once you're satisfied with the placement, we can now remove the backing tape.  
Adhere the mount directly onto the glass wall. The installation is now finished.
